1. The Amendment filed on 03/13/2007 has been entered. Claims 1-16 are pending in this Office action.

Response to Arguments

2. Applicant's arguments, see Applicant's Remarks on pages 2-5, filed on 03/13/2007, with respect to claims 1-2, 6, 10 and 14-16 have been fully considered and are persuasive. The rejection of claims 1-2, 6, 10 and 14-16 has been withdrawn.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

3. The present invention is directed to a method of acquiring incoming signals in a wireless network device. Each independent claim identifies uniquely distinct features "acquiring the incoming signals using a default acquisition preamble having a default synchronization period" and "evaluating the incoming signals to determine whether ith signal parameters are met" and "changing to an ith alternate acquisition preamble having an ith synchronization period if the ith signal parameters are met". The closest prior art, Odman et al. US Patent 7,120,126 B2, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
